SKILLS

- **Languages:** C, C++, Java, JavaScript, Python
- **Tools/Platforms:** VS Code, IDLE, LeetCode
- **Core CS Fundamentals:** DBMS, OS, CN, SQL, OOPs
- **Soft Skills:** Problem-Solving, Project Management, Adaptability, Resilience

PROJECTS

Walmart Sales Intelligence & Predictive Analytics Dashboard | [GitHub](#)

Mar'26

- Developed an end-to-end sales forecasting app using XGBoost and Python, achieving high accuracy by engineering seasonal and holiday-impact features.
- Architected an interactive Streamlit dashboard with a CI/CD pipeline via GitHub, ensuring real-time automated deployment of model updates to the cloud.
- Optimized a data pipeline for 45W+ rows using Pandas and Scikit-Learn, handling complex preprocessing and categorical encoding for robust predictions.
- **Tech Stack:** Python, XGBoost Regressor, Streamlit

Operating System- Deadlock Detection | [GitHub](#)

Apr'25

- Created a Java-based deadlock detection module using resource-allocation graphs to identify circular wait conditions in multithreaded environment.
- Implemented thread monitoring and synchronization analysis to automatically flag potential deadlock scenarios and improves system reliability.
- Improved system reliability by preventing deadlocks and execution freezes, enabling smoother concurrent processing and reducing debugging time for scalable, high-performance applications.
- **Tech Stack:** Java, Bash

Coffee Shop Sales | [GitHub](#)

May'25

- Analysed sales data to identify peak hours, product performance and customer trends.
- Performed data cleaning, created KPIs and designed an interactive dashboard for business insights.
- Leveraged data visualization to guide staffing, product promotion, and inventory optimization based on actual sales patterns, enabling smarter business decision.
- **Tech Stack:** Excel, Power BI, DAX

TRAINING

Summer Training| LPU | Machine Learning: Basics to AI Application | [Certificate](#)

Jun'25 – Jul'25

- Learned Fundamentals of Machine Learning and AI Concepts.
- Designed algorithms for data analysis and predictive model in Python.
- Explored tools such as Scikit-Learn, Numpy, and Pandas.
- Utilized machine learning to forecast trends, detect user behaviour patterns, streamline decision-making for data-driven business insights.

CERTIFICATES & CERTIFICATIONS

- Computational Theory: Language Principal & Finite Automata Theory – Infosys | [Certificate](#) Oct'25
- Digital System: From Logic Gate To Processor – Coursera | [Certificate](#) Sept'24
- Introduction to Hardware and Operating System - Coursera | [Certificate](#) Sept'24
- Legacy Responsive WebDesign – FreeCodeCamp | [Certificate](#) Nov'23

ACHIEVEMENTS

- Secured top 5 position in a college hackathon. Jul'25
- **Secured Global Rank 982nd:** May'25
Among 15k+ participants in Biweekly Contest 96.

EDUCATION

- **Lovely Professional University** Punjab, India
Bachelor of Technology - Computer Science and Engineering **CGPA: 6.7** Since Aug'23
- **RN College :** Hajipur, Bihar
Intermediate: **Percentage: 70%** Apr'21 – Apr'23
- **Virtuous International K-12 School:** Hajipur, Bihar
Matriculation: **Percentage: 45%** Apr'20 – Mar'21
